

# SmartWall Systems:

**ESCS**

(Expanded Shale Clay and Slate) is a ceramic aggregate, fired at 2000°F in rotary kilns.

## We've Been Fired!

Because SmartWall units are made with ESCS, they are able to provide thermal stability and strength other wall systems simply can not. When it comes to fire, SmartWall has already BEEN THERE, DONE THAT.

**Insulating • Strong • Thermally Stable**

**Fire Performance You Can Count On.**
